# INSTALLATION

## MINIMUM SYSTEM REQUIREMENTS

- MechWarrior 2 CD-ROM
- IBM PC or 100% compatible
- 486DX2/66 MHz processor
- 8 MB RAM (7 MB of free extended memory)
- Double-speed CD-ROM drive (300K/sec transfer rate)
- Hard disk drive with 45 MB of uncompressed space available
- VESA Local Bus (VLB) or PCI video
- 256 color SVGA (640 x 480)
- MS-DOS 6.0
- 100% Microsoft®-compatible mouse and driver
- 100% Sound Blaster-compatible sound card (digital and FM/MIDI audio)
- Dedicated game card highly recommended for joystick

## SUPPORTED SOUND DEVICES

Creative Labs Sound Blaster Basic, Pro, 16 and AWE 32; Media Vision Pro Audio Spectrum Basic, Plus and 16; Gravis Ultrasound; Ensoniq Soundscape; Roland MT-32; General MIDI devices

## SUPPORTED INPUT DEVICES

Standard two-button joysticks; CH Flightstick, ProPedals and Virtual Pilot Pro; Thrustmaster flight, weapons and rudder control systems; Thrustmaster F-16 Flightstick; Gravis gamepad and Phoenix joystick; Virtual I/O i-glasses; Suncom Technologies SFX gamepad; Microsoft® Sidewinder joystick; Spaceball Avenger; Logitech Wingman Extreme; Forte VFX-1 Headgear

Here is some important information that you should know before you install and start your Ghost Bear experience.

### HARD DISK

The game requires 37 MB of UN-compressed free disk space. Ghost Bear will not work properly using compressed hard disk space (such as Stacker and DoubleSpace). If you have the space, there are two other install options that require even more hard disk space and allow animations and movies to run even smoother.

### MEMORY

In order to run Ghost Bear you need over 6.9 MB of extended memory. If you have between 6.5 MB and 6.9 MB of extended memory, the game will play, but some missions will run slower. For optimal performance it is best to configure your memory so you have over 6.9 MB of extended memory. To help you free up more memory, we included a Boot Disk-making utility which you will be prompted to use from the Installer.

### OTHER OPERATING SYSTEMS AND WINDOWS® 95

Ghost Bear requires MS-DOS 6.0 or later. Other operating systems (e.g., OS/2 Warp and Windows NT) are not supported. Although Ghost Bear might work just fine with them, we have not tested thoroughly with them. If you have a problem using unsupported operating systems it is best to contact the operating system company to try and work out compatibility issues. Please check Activision's on-line forums on a regular basis for future updates on Ghost Bear compatibility issues.

### VESA VIDEO DRIVERS

Ghost Bear requires that your system have a standard VESA video driver to run your video. Please verify that you have one loaded before launching Ghost Bear.

If the VESA driver supplied by your video card does not function properly with Ghost Bear, try using the UNIVBE VESA driver. This is available for downloading from our Activision BBS or any of our on-line locations. It might also be located on your local BBS or other on-line services.

### CONTROLLERS

Ghost Bear supports a wide variety of input devices. Please consult or refer to the Cockpit Controls section in the MechWarrior 2 Installation Guide for further details.

### TROUBLESHOOTING

We have compiled extensive information on troubleshooting. This is an extremely valuable resource for anyone having difficulty running this game. The information is available for installation by typing **MW2** at the prompt. For assistance on Ghost Bear, please visit our on-line forums.

### INSTALLING GHOST BEAR

#### INSTALLING GHOST BEAR

1. Insert the Ghost Bear's CD-ROM into the drive that your CD drive is connected to.
2. At the DOS prompt, type **CD**.
3. At the D:\> prompt, type **INSTALL**.
4. Follow the on-screen instructions.

#### INSTALLING GHOST BEAR

1. Make sure the game's CD-ROM is in the drive that your CD drive is connected to.
2. Close all open windows and click on the "X" located in the top right corner of the window. Do this by right-clicking on the "X".
3. Double-click on the "My Computer" icon.

(The name of this icon may vary depending on your system.) In the window that appears, click on the "Install" icon. (The icon will have a picture of a CD-ROM.) Double-click on this icon to start the Ghost Bear installation.

Note that a message will appear stating that the game's boot disk maker will not work properly with your system. This is normal and does not affect the installation.

## TROUBLESHOOTING

We have compiled extensive information on compatibility issues and solutions into a README file. This is an extremely valuable resource that should be consulted first in the event you experience any difficulty running this game. The README.TXT file can be viewed when running the Installer and after installation by typing **MW2SETUP** in the Ghost Bear directory. To access the latest information and assistance on Ghost Bear, please download the Ghost Bear Update document from one of the Activision on-line forums.

## INSTALLING GHOST BEAR'S LEGACY

### INSTALLING UNDER DOS

1. Insert the Ghost Bear's Legacy CD into your CD-ROM drive (for these instructions, we will assume that your CD drive is drive D:).
2. At the DOS prompt, type **D:** and press **Enter**.
3. At the D:\> prompt, type **INSTALL** and press **Enter**.
4. Follow the on-screen instructions carefully.

### INSTALLING UNDER WINDOWS 95

1. Make sure the game's CD is in the CD-ROM drive.
2. Close all open windows on your screen. You can close a window by clicking on the close button ("X") located in the top right-hand corner of the window. Also close programs listed on the Taskbar. Do this by right-clicking on a program's button and selecting **"Close."**
3. Double-click on the **"My Computer"** icon located on the desktop.

(The name of this icon may have been changed by you or the person who installed Windows 95 on your system.) In the window that opens, double-click on the icon for your CD-ROM drive. Look for the Install icon. (The icon is a picture of a window labeled **Install** underneath it.) Double-click on this icon to start the Ghost Bear's Legacy Installer and follow the on-screen instructions.

Note that a message will appear that asks if you want to make a boot disk—answer **"No."** The game's boot disk maker utility was designed for systems using DOS as their operating system and will not work properly with Windows 95.

4. After installation is complete, if the DOS box is still on the screen, close it by clicking on the close button ("X") located in the top right-hand corner of the DOS box window.

Here are the basic steps the Installer will follow:

#### A. General Notes

- To abort the installation process, press **Ctrl-X**. If you do so, make sure to delete the Ghost Bear's Legacy directory and its subdirectories, if created.
- Memory is checked before installing. You will need 6.9 MB of RAM to run Ghost Bear's Legacy. If you get the warning message that you are below the required amount, you will probably be able to install anyway. At the end of the installation process, you will be given the opportunity to create a Boot Disk to help in freeing up more memory.
- Your hard disk drive space is checked for sufficient room to install. Ghost Bear's Legacy requires a minimum of 37 MB to 157 MB of free uncompressed disk space, depending on the install option you select.
- A VESA video driver is checked for since it is required to run Ghost Bear.
- If you have any trouble with the installation, please consult the README.TXT file and the GBLINFO.TXT file.

#### B. Configuring Sound Devices

In order to enjoy the audio component of the game, you will need to select your sound devices for MIDI music and digital audio. The Installer will attempt to detect your sound configuration automatically and select the appropriate drivers. However, on some systems you may need to choose your sound card manually from the list provided. The Installer will then try to verify the presence of that sound card in your system. If your sound card is not shown and is 100-percent Sound Blaster-compatible, you should be able to select the "Creative Labs Sound Blaster or 100% compatible" driver to hear sound and music in the game. When you are finished selecting the proper sound devices, select **Accept Settings** and press **Enter**.

#### C. Viewing README

At this point in the finished viewing this the Ghost Bear directory included the GBLINFO many technical and You can access GBL editor (e.g., EDIT) or You can always com

#### D. Installing the Game

The next step is to press **Enter**. If you device settings and p **Installation Settings** select **Accept These**

You will need to select Blown. For each of the space required for the game. The Installer will making sure that you change to a different the install option you w

**NOTE:** If you want to Ghost Bear directory. A

#### E. Electronic Registration

After the game is installed Bear via our on-line registering your purchase

### C. Viewing README File

At this point in the installation process, a README file is displayed. Press **ESC** when you have finished viewing this file. You can always come back and review it by typing **MW2SETUP** from the Ghost Bear directory. Because many users wish to hurry on to the game we have separately included the GBLINFO.TXT file that is mentioned in the README. The GBLINFO.TXT file covers many technical and compatibility questions and solutions; we strongly suggest you review it. You can access GBLINFO.TXT from your Ghost Bear install directory by using your favorite text editor (e.g., EDIT) or word processor.

You can always come back and review it by typing **MW2SETUP** from the Ghost Bear directory.

### D. Installing the Game

The next step is to install Ghost Bear files to your hard drive. Select **Begin Installation** and press **Enter**. If you wish to view or change your settings (such as the default directory, sound device settings and performance option settings) before installation, just select **View or Change Installation Settings** and press **Enter**. When you are ready for Ghost Bear files to be installed, select **Accept These Settings and Install** then press **Enter**.

You will need to select one of three install options: (1) Minimal, (2) Recommended or (3) Full-Blown. For each of these settings, there is an inherent trade-off between the amount of hard drive space required for the install and the playback rate and quality of animations and movies in the game. The Installer will explain the differences between each option. Select the option you want, making sure that you have enough hard disk space to install it. Later on, if you ever want to change to a different install option, just delete the Ghost Bear directory and re-install, selecting the install option you want.

**NOTE:** If you want to save your pilot careers, make a copy of MW2REG.CFG before deleting the Ghost Bear directory. After installation, copy this file back into the Ghost Bear directory.

### E. Electronic Registration (North America Only)

After the game is installed, you will be presented with the option to register your copy of Ghost Bear via our on-line registration system. If you have a modem connected to your computer, registering your purchase of Ghost Bear is very easy, quick and toll-free. All you have to do is fill in

the requested information (basically your address plus a couple of other questions). Once you have finished, select **SEND** and your registration information will be sent to us via our toll-free 800 number. Of course, if you want to register later, just select **BYPASS**. Please only register once. If you successfully use the on-line registration method, there is no need to mail in the enclosed registration card.

#### F. Creating a Boot Disk

Next, you will be asked if you wish to make a Boot Disk. This procedure requires that you insert a disk into your **A:** drive. Please verify that you have created a backup of the contents of this disk, since this process will erase all data on it. Also, use a high-density disk. When the formatting process is complete and you have typed in a volume label for the Boot Disk, you will be asked if you want to format another; type **N** for "no" and press **Enter**.

6. When installation is complete, you will be returned to the directory in which Ghost Bear was installed. To begin your Ghost Bear experience, type **GBL** and press **Enter**.

#### POST-INSTALLATION NOTES

After installing Ghost Bear, it is easy to change your sound device configurations, view the README file, make a Boot Disk and register Ghost Bear electronically (if you bypassed this step while installing). All you have to do is go to the Ghost Bear directory on your hard drive, type **MW2SETUP** and press **Enter**. This will launch a program that will allow you to do all of these things.

# GHOST BEAR'S LEGACY INTRODUCTION

The Star League, established in 2571, united the five powers of the Inner Sphere into a treaty of peace and economic cooperation in an attempt to end decades of strife. By the twenty-eighth century, greed and years of peace had overshadowed the hatred of war that had resulted in the League. In 2784, Aleksandr Kerensky, deposed leader of the Star League, assembled his loyal officers and departed from the Inner Sphere on an exodus to begin a new civilization. The destiny of this civilization, its Hidden Hope, was to one day return to the Inner Sphere and reform the Star League.

In 2786, Kerensky founded the five planets of the Pentagon, which would be the refugees' new home. Fifteen years later, tensions among the different peoples again turned into war. After Aleksandr Kerensky's death, his son Nicholas gathered together 800 loyal subjects, who left on another exodus to the cluster world of Strana Mechty, "Land of Dreams." Without the influence of a Kerensky, a two-decade war broke out among the planets of the Pentagon.

On Strana Mechty Nicholas Kerensky restructured his society. He divided his 800 followers into 20 Clans, based on a caste system that placed the warrior at the head of the hierarchy. This is a Clansman's family, he has no other. All allegiance is paid to one's Clan.

The Clans returned to and conquered the planets of the Pentagon, and Kerensky continued to remove all vestiges of Inner Sphere life. He established a eugenics program through which all those of the warrior caste, the leaders of Clan society, are created through genetic manipulation of the original members of themselves in battle. Freeborns, those not genetically created, are reviled.

Now, in 3058, the Clans are in the midst of an invasion to retake the Inner Sphere and take back their rightful place as heads of the Star League. Each of the Clans strives to be the first to take Terra, the cradle of the species. Although the Clans are presently bound by a truce, they await the time when they will be able to resume their attack on those planets closest to Terra. Clan Ghost Bear, the mightiest of Kerensky's warriors, must head the Clans' return home.

# NON-COMBAT PROTOCOL

## COMBAT SIMULATOR

When you're in the Ice Clan Hall, the opening to the right leads to the Combat Simulator, where you have four choices.

Note: These missions are randomly generated by the computer. You may use the 'Mech of your choice, customizable in the 'Mech Lab.

Click on **LAUNCH** when ready to play.

Click on the 'Mech's name to enter the 'Mech Lab where you can configure your 'Mech.

Click on the up or down arrow to select different 'Mechs.

Exit

## MISSION COMPLETE

Click on **DETAILS** to get additional information about what's happening in the universe around you.

The **LOGOFF** button will take you back to where you were before you came to the computer.

The **INTELLIGENCE** section gives you a communique from Headquarters. Click on **VIEW** to play it.

**NOTE:** You cannot choose 'Mechs w at the Ice Clan Hall home base. Cho

## SELECTING A 'M

You can only change 'Mechs when you are out on missions, although you may. Lab, click on the name of the 'Mech.

## MISSION COMPUTER

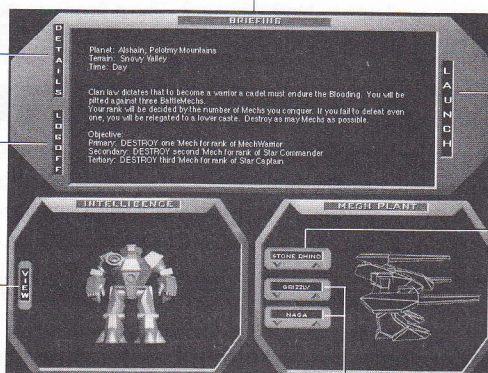

Click on **DETAILS** to get additional information about what's happening in the universe around you.

The **BREIFING** section gives written details about your mission.

The **LAUNCH** button will get you started on your mission.

The **LOGOFF** button will take you back to where you were before you came to the computer.

Click on **LAUNCH** when ready to play.

The **INTELLIGENCE** section gives you a communique from Headquarters. Click on **VIEW** to play it.

**STARMATES**

The **'MECH PLANT** section allows you to modify your 'Mech.

**NOTE:** You cannot choose 'Mechs when you are out on a mission; you can only do so when you are at the Ice Clan Hall home base. Choose wisely.

## SELECTING A 'MECH

You can only change 'Mechs when you are at the Ice Clan Hall home base; you cannot do so when you are out on missions, although you may configure your 'Mech before every mission. To enter the 'Mech Lab, click on the name of the 'Mech.

Exit

# NEW WEAPON SYSTEMS

In addition to all the weapons available in MechWarrior 2, Ghost Bear's Legacy provides these new weapon systems for your use.

## ANTI-MISSILE SYSTEM

The anti-missile system is a rapid-fire, point-defense machine gun capable of tracking, engaging, and destroying incoming missiles. While very effective, the system's primary drawback is its high ammunition consumption. When a salvo of missiles attacks any BattleMech equipped with an anti-missile system, the system automatically engages the salvo before they can hit the protected 'Mech.

## ARROW IV MISSILE ARTILLERY

The Arrow IV is a stand-alone missile system designed to deliver long-range salvos. The Arrow system uses the area-saturation missile, which attacks an area rather than a specific target, inflicting massive explosive damage to any object within a 45-meter blast radius.

## FLAMER

The flamer is a short-range energy weapon that taps into the superheated plasma of the BattleMech's fusion reactor. The flamer causes a great deal of heat to buildup on the target but it also causes a large heat build-up in the 'Mech that is using it. Therefore, caution should be exercised when using this weapon system.

## INFERNO MISSILE

Inferno missiles are special-purpose missiles. Inferno missiles come in guided and unguided systems.

## NARC MISSILE

The Narc missile beacon is a heavily armored pod made up of powerful homing beacon. The pod broadcasts a homing signal for incoming missiles. Once established, the signal is

**INFERNO MISSILES**

Inferno missiles are special-purpose missiles designed to affect the heat level of enemy BattleMechs. Inferno missiles come in guided and dumb-fire modes and operate the same as SSRM-2 and SRM-2 systems.

**NARC MISSILE BEACON**

The Narc missile beacon is a heavily modified missile launcher that fires special missiles, called pods, made up of powerful homing beacons mounted behind a magnetic head. If the missile hits its target, the pod broadcasts a homing signal for any friendly missile systems equipped to receive Narc transmissions. Once established, the signal lock cannot be broken and the Narc cannot be destroyed.

**TORPEDOES**

Torpedoes are maritime versions of regular short- and long-range missiles. Units equipped with torpedo racks may not use normal missile ammo, and missile racks may not use torpedo ammunition.

ER Small Laser	RT (R)	1	0.5

### Capabilities

The Linebacker's increased speed means it carries less armament, but those weapons it does carry, along with its speed, make it a formidable foe on the battlefield. In its standard configuration, the Linebacker punishes threats from a distance. Enemies that do not succumb to its energy weapons or run away from its missile barrage are taken care of by its heavier compatriots.

# GRIZZLY

Mass: 70 tons  
 Chassis: Endo Steel  
 Power Plant: 280 Standard  
 Cruising Speed: 43.2 kph  
 Maximum Speed: 64.8 kph  
 Jump Jets: 4  
 Jump Capacity: 120 meters

LRM-10	RT	1	2.5
Ammo (LRM) 12	RT	1	1
Jump Jets	RL	2	2
Jump Jets	LL	2	2

## Capabilities

The Grizzly is used by PGC commanders for roles that other Clans would fill with Summoners and Hellbringers. The 'Mech's heavier armor and standard engine give it a much higher survival rate, which is fortunate because it is difficult to repair. The Grizzly has layers of sloped armor that tend to lodge in place when damaged, and its bulky leg actuators are apparently unique and hard to obtain.

The Grizzly mounts a deadly array of weapons, featuring a massive Gauss rifle in the right arm. The 'Mech's left arm sports a trio of pulse lasers similar to, but smaller than, the array featured in Configuration D of the Executioner. The 'Mech's long-range firepower is supplemented by a ten-pack of long-range missiles in the right torso.

# I.S. HATAMOTO

Mass: 80 tons  
 Chassis: Earthwerks VOL Endo Steel

### Capabilities

The Naga was developed to deliver a sustained barrage of artillery missiles. The OmniMech's standard configuration best fulfills this mission by carrying six tons of missiles, assuring that it will be able to support its Cluster mates through all but the longest battle. However, the standard configuration Naga is the most defenseless in a short-range battle, with only three small lasers to ward off any enemy that manages to come close.

## I.S. VICTOR

CASE	RT	0	0

### Capabilities

Most Clan MechWarriors who pilot Executioners choose the exceptional firepower of the Gauss. It combines with the pair of large lasers to deliver harsh punishment to opposing 'Mechs.

For extended missions where ammunition might become a factor, the Clans normally outfit the Executioner with three large pulse lasers in the left arm and four extended-range medium lasers in the right. The Executioner's 14 double heat sinks allow it to use this array of lasers and still keep its heat under control.

Somewhat similar in performance to the standard version is model B, which carries the huge Ultra-20 Autocannon in the left arm and an extended-range particle projection cannon in the right. A small laser and anti-missile system round out its weaponry.

The fire-support version of the Executioner is relatively uncommon. Its most distinguishing feature is the enhanced targeting for all its weapons systems.

A highly unusual design for the Executioner has also been spotted on Pinnacle. It features a stack of two SRM-6 launchers affixed to its left arm. The right arm is a large triangular pod with a large pulse laser at the top, a row of three medium pulse lasers below it, and a row of five small pulse lasers at the bottom. This configuration has no hand, of course, and also requires the removal of the lower arm actuator.

## I.S. ANNIHILATOR

Ammo			
(Streak SRM-6) 30	LT	2	2
4 ER Medium Lasers	RA	4	4
4 ER Medium Lasers	LA	4	4

## Capabilities

Though never observed in action, certain assumptions about the Kodiak's performance can be made based solely on its weapon load. A devastating Ultra-20 autocannon occupies the entire right side of its torso. Opposite the autocannon is a pair of Streak SRM-6 launchers. Combined, these weapons provide ample close-in firepower but lack the ammunition to fight an extended battle. Designers probably disregarded this factor since the 'Mech is intended for garrison use close to supply lines. Above each hand is a claw-like array of four extended-range medium lasers, giving the Kodiak impressive hitting power even if it runs completely out of ammunition. Supplementing these weapons is a single ER large laser mounted in the torso directly beneath the engine. Likely added as an afterthought, this weapon gives the 'Mech a single shot at long range, but generates too much heat to be used once the enemy closes in.

# STONE RHINO

## Capabilities

The Stone Rhino weighs in at a massive 100 tons, comparable to the largest 'Mechs ever manufactured. While such machines bring awesome firepower to the battlefield, ultimately, commanders cannot use them effectively because they cannot afford to lose one.

The Stone Rhino features twin Gauss cannons, a large pulse laser mounted in each arm and an almost superfluous small pulse laser. The arm-mounted weapons feature retractable shock-absorbing cowls covering the barrels which allow the pilot to use the arms as battering rams without damaging the delicate laser assemblies.

#### ACTIVISION Limited 90-Day Warranty

Activision warrants to the original consumer purchaser of this computer software product that the recording medium on which the software program is recorded will be free from defects in material and workmanship for 90 days from the date of purchase. If the recording medium is found defective within 90 days of original purchase, ACTIVISION agrees to replace, free of charge, any product discovered to be defective within such period upon receipt at its Factory Service Center of the product, postage paid, with proof of date of purchase, as long as the program is still being manufactured by ACTIVISION. In the event that the program is no longer available, ACTIVISION retains the right to substitute a similar product of equal or greater value.

This warranty is limited to the recording medium containing the software program originally provided by ACTIVISION and is not applicable to normal wear and tear. This warranty shall not be applicable and shall be void if the defect has arisen through abuse, mistreatment, or neglect. Any implied warranties applicable to this product are limited to the 90-day period described above.

To receive a replacement, you should enclose the original product disks only, in protective packaging accompanied by

- a brief statement describing the defect,
- your name and return address, and
- a photocopy of your dated sales receipt.

Please see the special "RETURNS" information for further instructions. Any questions? Call ACTIVISION Customer Support at one of the numbers shown below.

EXCEPT AS SET FORTH ABOVE, THIS WARRANTY IS IN LIEU OF ALL OTHER WARRANTIES, WHETHER ORAL OR WRITTEN, EXPRESS OR IMPLIED, INCLUDING ANY WARRANTY OF MERCHANTABILITY OR FITNESS FOR A PARTICULAR PURPOSE, AND NO OTHER REPRESENTATION OR CLAIMS OF ANY KIND SHALL BE BINDING ON OR OBLIGATE ACTIVISION. IN NO EVENT WILL ACTIVISION BE LIABLE FOR SPECIAL, INCIDENTAL, OR CONSEQUENTIAL DAMAGE RESULTING FROM POSSESSION, USE, OR MALFUNCTION OF THIS PRODUCT, INCLUDING DAMAGE TO PROPERTY AND, TO THE EXTENT PERMITTED BY LAW, DAMAGES FOR PERSONAL INJURY, EVEN IF ACTIVISION HAS BEEN ADVISED OF THE POSSIBILITY OF SUCH DAMAGES. SOME STATES DO NOT ALLOW LIMITATIONS ON HOW LONG AN IMPLIED WARRANTY LASTS AND/OR THE EXCLUSION OR LIMITATION OF INCIDENTAL OR CONSEQUENTIAL DAMAGES, SO THE ABOVE LIMITATIONS AND/OR EXCLUSION OR LIMITATION OF LIABILITY MAY NOT APPLY TO YOU. THIS WARRANTY GIVES YOU SPECIFIC LEGAL RIGHTS, AND YOU MAY HAVE OTHER RIGHTS WHICH VARY FROM STATE TO STATE.

After the warranty period, a defective Activision CD or floppy disk may be returned to Activision with a check or money order for \$7 U.S. (AUD\$12.00 for Australia, or £7.00 for Europe) currency per CD or floppy disk for replacement (must be within one year of purchase).

#### RETURNS:

Certified mail is recommended for returns. For best service, please be sure to—

1. Send the original product disks only, in protective packaging.
2. Enclose a photocopy of your dated sales receipt.
3. Enclose your name and return address, typed or printed clearly, inside the package.
4. Enclose a brief note describing the problem(s) you have encountered with the software with the name of the product and the brand and model name or model number of your computer.
